

Butyl Acrylate

APPLICATION

Butyl acrylate is used in the production of homopolymers and co-polymers such as acrylic acid and its salts, esters, amides, methacrylates, acrylonitrile, maleates, vinyl acetate, vinyl chloride, vinylidene chloride, styrene, butadiene and unsaturated polyesters. When used in latex paint formulations acrylic polymers have good water resistance, low temperature flexibility and excellent weathering and sunlight resistance.

SPECIFICATION

Item	Standard
appearance	Clear, colorless liquid with a characteristic fruity odor
Purity %	99.5 Min.
Water,%	0.05 Max.
Color (APHA)	10 Max.
Acidity(AS AA),%	0.005 Max.
Inhibitor (MEHQ),ppm	15+5(As agreed upon between the buyer and the seller)

PACKING

In polyethylene drums (net weight 180kg) or iso-tank.

It should be kept in a dry, cool and well-ventilated place. It is a corrosive material and it should be stored in a separated and approved area. Keep away from sources of ignition.
